REFRIGERATE FOR OPTIMUM ACTIVITY

Available in bottles of 30, 60, and 120 capsules.

NO FILLERS/NON-ALLERGENIC

Supports digestion for a healthy intestinal balance*

Beneficial bacteria often become imbalanced by poor diet choices and environmental lifestyle stressors. Issues can arise when opportunistic microorganisms feed on undigested food molecules, creating gas. This comprehensive probiotic formula includes six different probiotic sources totaling more than 5 billion colony forming units (c.f.u.) per capsule.** Chosen for their safety and efficacy, the GI stable and heat stable microorganisms mirror the ratios found in a healthy GI tract.* These organisms enhance the ecological balance of friendly bacteria, benefiting digestion, elimination, and immune function by populating the gut with the "friendly" naturally occurring bacteria vital to our overall health.*

- **Probiotic Blend.** Optimal flora supports relief from occasional GI discomfort, reduces problems associated with lactose intolerance, and encourages healthy and timely elimination by acting as a natural stool softener.* Probiotics also support production of enzymes such as protease, lipase, and lactase, further encouraging more complete digestion.*
- **Jerusalem Artichoke.** This tuber is a prebiotic plant fiber that supplies nourishment for good bacteria.*
- **Lactoferrin.** This multifunctional protein is known for its ability to support a healthy immune system.*

Health Benefits: Transformation's Professional Protocol™ Probiotic is a probiotic supplement designed to help promote gastrointestinal system health, assist with regularity, and support a healthy immune system.*
